

JEE MAIN ORGANIC CHEMISTRY – SOME BASIC PRINCIPLES AND TECHNIQUES — HYPERCONJUGATION — PYQS

Max. Marks: 12
Questions: 3

Section A (MCQ) — 3 questions

Q.1 The cyclic cations having the same number of hyperconjugation are :

Choose the **correct** answer from the options given below :

[JEE Main 2026 (Online) 28th January Evening Shift]

- (1) B and C Only (2) A and B Only
 (3) A and C Only (4) A, C and D Only

Scan or tap for the full solution

Q.2 Given below are two statements :

Statement-I: $(\text{CH}_3)_3\text{C}^\oplus$ is more stable than $\text{CH}_3^\oplus$ as nine hyperconjugation interactions are possible in $(\text{CH}_3)_3\text{C}^\oplus$.

Statement-II: $\text{CH}_3^\oplus$ is less stable than $(\text{CH}_3)_3\text{C}^\oplus$ as only three hyperconjugation interactions are possible in $\text{CH}_3^\oplus$.

In the light of the above statements, choose the **correct** answer from the options given below

[JEE Main 2026 (Online) 23rd January Evening Shift]

- (1) Statement-I is false but Statement-II is true
 (2) Statement-I is true but Statement-II is false
 (3) Both Statement-I and Statement-II are true
 (4) Both Statement-I and Statement-II are false

Scan or tap for the full solution

Q.3 Given below are two statements :

Statement-I: Hyperconjugation is not a permanent effect.

Statement-II: In general, greater the number of alkyl groups attached to a positively charged carbon, greater is the hyperconjugation interaction and stabilization of the cation.

In the light of the above statements, choose the correct answer from the options given below

[JEE Main 2025 (Online) 3rd April Evening Shift]

- (1) Statement-I is false but Statement-II is true
 (2) Statement-I is true but Statement-II is false
 (3) Both Statement-I and Statement-II are false
 (4) Both Statement-I and Statement-II are true
