Q.13 Given below are two statements:

In light of above statements choose the most appropriate answer from the options given below.

Statement-I: Biot-Savart's law gives us the expression for the magnetic field strength of an infinitesimal current element ($I dl$) of a current carrying conductor only.

Statement-II: Biot-Savart's law is analogous to Coulomb's inverse square law of charge q , with the former being related to the field produced by a scalar source, $I dl$ while the latter being produced by a vector source, q . [NEET (UG) 2022]

- (1) Both Statement-I and Statement-II are correct
- (2) Both Statement-I and Statement-II are incorrect
- (3) Statement-I is correct and Statement-II is incorrect
- (4) Statement-I is incorrect and Statement-II is correct

Q.57 A particle having a mass of 10^{-2} kg carries a charge of $5 \times 10^{-8} \text{ C}$. The particle is given an initial horizontal velocity of 10^5 m s^{-1} in the presence of electric field $\vec{E}$ and magnetic field $\vec{B}$. To keep the particle moving in a horizontal direction, it is necessary that

Which one of the following pairs of statements is possible ?

- A. $\vec{B}$ should be perpendicular to the direction of velocity and $\vec{E}$ should be along the direction of velocity
B. Both $\vec{B}$ and $\vec{E}$ should be along the direction of velocity
C. Both $\vec{B}$ and $\vec{E}$ are mutually perpendicular and perpendicular to the direction of velocity.
D. $\vec{B}$ should be along the direction of velocity and $\vec{E}$ should be perpendicular to the direction of velocity
