Q.2 Select the incorrect statements from the following:
A. Digestive system in Platyhelminthes is incomplete.
B. Bilateral symmetry is a characteristic feature of adult Echinoderms.
C. Pseudocoelom is possessed by Aschelminthes.
D. Notochord is persistent throughout life in the class Chondrichthyes.
E. Members of class Reptilia maintain a constant body temperature.

Choose the answer from the options given below:

[NEET (UG) 2026]

- (1) A and C only (2) B and E only
(3) B and D only (4) C and D only

Q.3 A group of researchers procured some fish-like animals and upon investigation the following characters were observed:
Which of the following species of animals did they consider to fit best with these characters?

- A. Endoskeleton was made of cartilage.
B. Ectoparasitic; as they were found attached on fish skin with their circular sucking mouth.
C. Paired fins and scales were absent, but 7 pairs of gill slits were present. [NEET (UG) 2026]

- (1) *Scoliodon* sp. (2) *Exocoetus* sp.
(3) *Petromyzon* sp. (4) *Branchiostoma* sp.

Q.5 Given below are two statements:

Statement-I: The class name Reptilia refers to creeping or crawling mode of locomotion.

Statement-II: All organisms belonging to Reptilia have three chambered heart.

In the light of the above statements, choose the most appropriate answer from the options given below:

[RE-NEET (UG) 2026]

- (1) Statement-I is incorrect but Statement-II is correct
(2) Both Statement-I and Statement-II are correct
(3) Both Statement-I and Statement-II are incorrect
(4) Statement-I is correct but Statement-II is incorrect

Q.7 Given below are two statements:

Statement-I: When any plane passing through the central axis of the body divides the organism into two identical halves, it is called radial symmetry.

Statement-II: In phylum Echinodermata, both adults and larvae are radially symmetrical.

In the light of the above statements, choose the most appropriate answer from the options given below:

[RE-NEET (UG) 2026]

- (1) Statement-I is incorrect but Statement-II is correct
 (2) Both Statement-I and Statement-II are correct
 (3) Both Statement-I and Statement-II are incorrect
 (4) Statement-I is correct but Statement-II is incorrect

Q.8 Given below are two statements: one is labelled as **Assertion (A)** and the other is labelled as **Reason (R)**.

Assertion (A): All vertebrates are chordates but all chordates are not vertebrates.

Reason (R): The members of subphylum Vertebrata possess notochord during the embryonic period, the notochord is replaced by cartilaginous or bony vertebral column in adults.

In the light of the above statements, choose the correct answer from the options given below:

[NEET (UG) 2025]

- (1) (A) is true but (R) is false
 (2) (A) is false but (R) is true
 (3) Both (A) and (R) are true and (R) is the correct explanation of (A)
